**Restriction/Election**

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-7, 10-16 and 19-42 drawn to ophthalmic lenses, classified in class 351, subclass 159.

II. Claims 8, 9, 17 and 18 drawn to lenses coating, classified in class 428, subclass 2+.

The inventions are distinct, each from the other because of the following reasons:

Each of the invention, I-II, recites limitations not recited in any of the other invention. The differing limitations make the inventions I-II patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I-II would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2873

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

2. If Group I is elected, then an election of species, as set forth below is required.

This application contains claims directed to the following patentably distinct **species** of the claimed invention:

A) Claims 1-7, 10-16 and 19-22 drawn to ophthalmic lenses with a marking.

B) Claims 23-42 drawn to ophthalmic lenses with a configuration permitting visual discrimination between the inner region and the outer region of effective area of the lens.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An

Art Unit: 2873

argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
